METHOD

We are going to prepare a brownie in the mug.

1. We start by sifting flour and cocoa powder* together – you can whisk them, but sifting really is best. Cocoa powder often has a bunch of lumps and sifting breaks them up.

**We love how versatile the recipe is, you really can change it to your liking. If you don't have unsweetened cocoa powder, you can try hot chocolate mix. Just keep in mind, you may need to reduce the sugar a little.*

2. Add remaining ingredients. Stir well to combine.

3. We microwave the brownie (without peeking) for 1 minute and 30 seconds. We've found any longer just dries the brownie out.
